## SPOOL TYPE WINCH

**Used On The A3 and CX3 Volleyball Systems**

For set up video go to [www.scheldesports.us](http://www.scheldesports.us) and click on volleyball set up video. View the CX3 and A3 set ups which both use this winch.

**GEN 2 WINCH**

## Spool Type Winch Set-Up Instructions

1. Unpack all materials and items.
2. To install, use a 10mm wrench to remove the 2 clamp bands, then place the winch onto one of the posts and reinstalling the clamp bands. The bottom of the winch box should be approximately 3 feet from the floor when the post is in the floor sleeve. The winch box should line up with the upper wheel. NOTE: Tighten the bolts securely so the winch does not slide when under tension.
3. Locate the top Kevlar cord on the net. Tie a loop on the end of the top cord. Put the cord over the top wheel then, place the loop onto the winch hook/finger. Tie this loop in a spot where most of the slack is out of the net and you can easily hook it up for subsequent set ups. See **Illustration 1** for overhand loop knot that should be used here.
4. Flip the handle out then start cranking it to tighten the top of the net.
5. Once the top of the net is to the desired tightness simply fold the handle back down.
6. Do these steps in reverse to take down the net.

## **Maintenance Instructions for Schelde Volleyball Equipment**

- Make sure all nuts and bolts are tightened and secure.
- Lubricate the winch periodically with lithium grease by removing the 4 bolts that hold the winch on the post and placing grease on the gears. A dab of grease will do. Rotate the handle to distribute the grease evenly on the gears.
- Padding can be cleaned with mild soap and water.
- Check cables for fraying and replace any with damage.
- Check T Handle lock for proper operation and locking. Replace if not locking properly.
- Replace warning labels and decals that are damaged. Contact Schelde Sports for new labels when needed.
